8 way

The GIGAMEDIA power supply **GGM CCP1210R8** supply a constant voltage to all output contacts. Each output is protected with a resettable fuse rated to 1.25 Amp. When the current of each single output is more than 1.25Amp, then the output terminals can still continuous working. When there is short circuit fault in the output terminals, there will be no output in the fault interface immediately. But the other shunts can also work normally.

The **GGM CCP1210R8** is protected against reverse polarity and fuse fault. Should the common supplied output be short circuited, the unit will drop the voltage until the fault is corrected. It will immediately reset the voltage when the fault is removed. The same applies when exceeding the current specification.

MAIN FEATURES

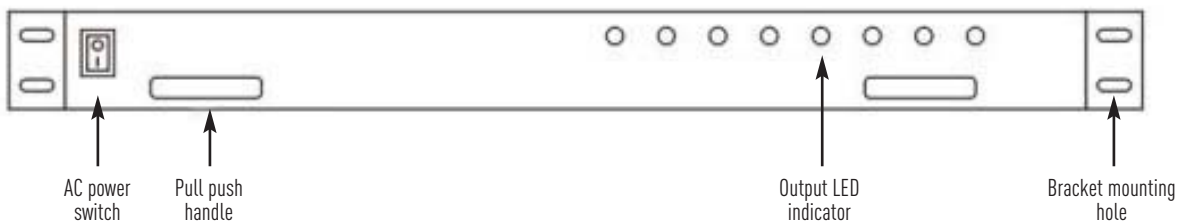

- Output LED indicative
- AC power switch (front of the panel)
- Protected against short circuit
- Rack mount 1U
- Power 10Amp

PRODUCT SPECIFICATIONS

- Modular 1U standard 19" rack mount chassis
- Environmental protection switching power supply circuit frame
- Small ripple & noise
- Splitter output by-pass failure to protect other equipment to work
- Input: 190-240V AC@50-60Hz
- Output voltage: 12V DC
- Output Current: 10Amp
- Output Channel: 8 Channel
- Overcurrent Protection: 12A±5%
- Ripple & Noise: ≤120mV
- Efficiency ≥85%
- Power protection:
 - Output over-voltage protection,
 - Over-current protection
 - Short circuit protection
- Enclosure Dimensions: 500*250*44mm
- Weight: 3.4kg
- Warranty : 2 years
